

Welcome to the Meals on Wheels corporate volunteer program. Companies, organizations, churches and schools across Topeka have discovered that Meals on Wheels is a tremendous volunteer opportunity for their employees and members.

How does it work?

- The corporation/organization is scheduled to deliver a route once a month, a few days a week or somewhere in between.
- The corporate delivery team made up of coworkers in pairs or individually, delivers the meals over the lunch hour.
- Typically teams can be set up so that no individual delivers more than once or twice a month.
- The program allows corporate social responsibility with consistency, flexibility and ease at minimal cost.
- One individual at your business/organization acts as a liaison with the Volunteer Coordinator streamlining the amount of time it takes to coordinate the schedule.

What are the benefits?

- Your company/organization is seen as a community partner helping to serve over 100,000 meals each year.
- This experience helps build employee morale, encourages improved employee communication and promotes team building.
- It allows busy people to give back to the community without taking away evening and weekend time with their families.
